SUMMARY

Believing in balancing academics and real-world experience, I had simultaneously pursued academic excellence and gaining practical skills, I thrived as a CS senior at AOU by day and a technician by night.
Recently competed the Google Data Analytics Professional Certificate & Design and Build Databases Warehouse from Colorado university under Sadia Data Analysis scholarship! The scholarship consisted of 3 stages (exam, onboarding, main program), where only the top 25% of participants in each stage advanced to the next, through this program, I gained expertise in data collection, cleaning, and processing, enabling me to conduct insightful data exploration, visualization, and modeling. This empowers me to transform data into actionable insights that drive informed decision-making.

SKILLS

- Microsoft Power BI and Tableau and Big Query.
- SQL, R and Python (Programming Languages)
- Extract, Transform, Load (ETL)
- MicroStrategy
- Spreadsheet excel.
- Data Mining, Warehousing
